

## LifeGuard SmartHome Mate with included SmartDock for enhanced audio

This unique, high-quality, low-cost smart companion, has many of the features of the **LifeGuard SmartHome IP Dialler**. The SmartHome Mate provides added functionality as a voice activated call point (or you can press the HELP button), and also supports many of the features and functionality of the SmartHome IPD, allowing you to access support from different areas of the home. The SmartHome Mate is your personal assistant.

We have partnered our unique platform with Samsung's high-quality tablets, and offer a range of options and specifications.

- Portable - easily move it to any room in the house
- Compatible with **Google Assistant**, **Google Home** and **LifeGuard SmartAlert** voice activation, allowing you to command the device via voice\* (e.g. say "Ask LifeGuard Nurse for Help" near the SmartHome Mate to trigger an alarm†)
- WiFi connectivity to SmartHome IPD or through home WiFi
- Optional 4G/LTE version for stand-alone, portable use
- Can make and receive mobile calls via LifeGuard's optional data network, potentially achieving significant call cost savings
- Health Information Portal - push notifications
- View messages, alerts and notifications
- Conduct Audio/Video calls with our nurse
- Up to 15 hours battery backup (depending upon use)
- Conduct voice and video calls to family and friends\*
- Play music, or keep up with current events via a Newsfeed\*
- Works with services, such as Telephone Service, Internet Browsing, TeleHealth Service, Home Automation, My Concierge, etc.\*
- Compatible with Mia Pendant\*

## SmartHome Mate Tablet Options

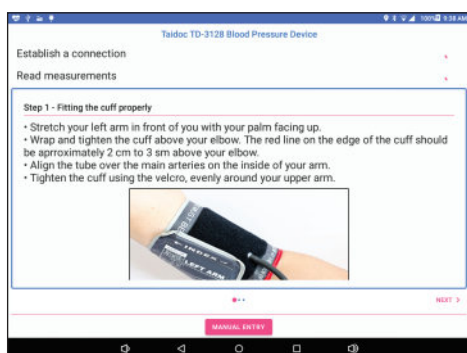

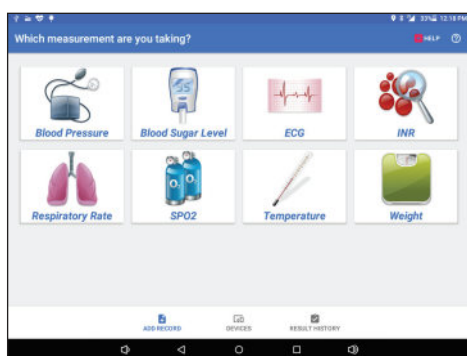

You choose the option that best suits your needs. Any of these models will work on WiFi. If you would like to add a SIM to make it portable, so you can use it outside the range of your WiFi connection, choose the 4G/LTE version.

• <b>Option 1</b>	8"	WiFi	16GB	Black
• <b>Option 2</b>	8"	4G/LTE	16GB	Black
• <b>Option 3</b>	10"	WiFi	16GB	Black

## TeleHealth Features

### Record and Track Your Vital Signs *(included free)*

The SmartHome Mate gives you the ability to record vital signs — either wirelessly using our approved range of monitors (BP, BSL, pulse, temperature, weight and ECG) or manually using your existing devices. You can access the stored data at any time via our free Client Portal, and you can even share an electronic report with your GP, if desired.

### Optional TeleHealth Service

The LifeGuard SmartHome Mate can also let you take advantage of our optional TeleHealth Service, which assists with monitoring people's health right in their own home.<sup>o</sup> It's particularly useful for those with medical conditions such as diabetes, COPD, chronic heart failure or unstable blood pressure. Vital signs (blood pressure, blood sugar levels, pulse, and various other measurements) can be automatically recorded and sent to a nurse at INS LifeGuard for monitoring, to ensure quick and professional support. If the readings are of concern, our nurse will action and follow-up with you.

### Automatic or Manual Entry of Measurements

We can supply Bluetooth capable monitoring devices that can automatically send your vital sign measurements to the SmartHome Mate. If you prefer to use existing non-Bluetooth capable devices, the results can be manually entered into the SmartHome Mate using the touch-screen. Either way, the results will be monitored by a Registered Nurse in our Emergency Response Centre.

### Registered Nursing Reviews

You can also receive a monthly Registered Nursing Review. Simply schedule an appointment via the SmartHome Mate. At the appointed time, our nurse will initiate an audio/video call. During the review our nurse will discuss with you any health issues, review your previous month's data, and if required and agreed, forward a report to your medical practitioner.

Features subject to change at discretion of INS LifeGuard.

\* In development.

† Always use a transmitter to activate your alarm if you're able to. In the event you can't press your transmitter or call point, the SmartAlert voice activation provides an alternate method to summon help. You must be in close proximity of your SmartHome Mate to use voice activation.

o TeleHealth functionality in development, coming soon.
